JIG-A-WORLD™ INTRODUCES JIG-A-PATCH™

The First Sprayable Spackle Kit in a Can

MONTREAL, June 2008 – Jig-A-World™, makers of Jig-A-Loo®, the invisible all-around lubricant, has officially launched **Jig-A-Patch™** in the U.S. The first wall repair kit in a spray-on can is now available at *The Home Depot*.

Jig-A-Patch combines the three key elements needed for wall repair and paint preparation: **sprayable spackle, a putty knife and a sanding pad**. **Jig-A-Patch** shortens prep time and reduces mess. The fast and easy way to fix cracks and holes in walls, **Jig-A-Patch** is simple to use:

- Step 1. Shake can very well
- Step 2. Spray a small amount of Jig-A-Patch spackle into the damaged area of a wall. Wait two minutes.
- Step 3. Using the integrated putty knife/cap, spread the spackle evenly. Wait two hours.
- Step 4. With the 3M reusable sanding pad (also included), gently sand the repaired area of the wall for a perfectly smooth finish.

“Jig-A-Patch is a unique product ideal for professional renovators and do-it-yourselfers,” said David Gilmour, CEO, Jig-A-World. “By combining high quality spray-on spackle, a versatile putty knife and 3M sanding pad into a compact package, we are offering a **complete wall repair kit in a can**. We’re convinced that professionals and do-it-yourselfers will find **Jig-A-Patch** to be efficient, convenient and easy to use,” Mr. Gilmour added.

Jig-A-Patch was one of only 36 products selected from thousands by Hardware Retailing magazine for the **Retailers’ Choice Award** at the 2008 National Hardware Show in Las Vegas. This prestigious award honors the **“Best of the Best” products on display at the National Hardware Show**.

With a suggested retail price of \$7.99 (5.5oz can), **Jig-A-Patch** is now available at *The Home Depot*.
