

FOR IMMEDIATE RELEASE

JIG-A-LOO OPENS U.S. HEADQUARTERS IN STATESVILLE, NORTH CAROLINA

STATESVILLE, N.C. (September 30, 2008) – Jig-A-Loo USA, Inc. today announced it will be opening its United States headquarters in Statesville, N.C. The Jig-A-Loo formula has proven itself in Canada’s industrial and commercial industries for 50 years, and has been “quietly” fixing squeaks and fighting rust and corrosion for a decade in the Canadian consumer marketplace. Since its introduction into the U.S. in 2007, Jig-A-Loo has quickly become recognized as a high-quality product with hundreds of everyday uses.

“Today’s grand opening solidifies Jig-A-Loo’s commitment to bringing its family of products to the United States. Although we have been selling here for the last year, the growing market demand for the Jig-A-Loo family of products warrants the opening of our official headquarters in the U.S.,” said Cindy Sutton, vice president of sales and marketing, Jig-A-Loo USA, Inc. “We would like to thank the community of Statesville for such a warm welcome and we look forward to becoming a part of the greater Statesville community.”

Jig-A-Loo is an all-purpose invisible lubricant and water-repellent with hundreds of practical applications around the home, car, office, garage/workshop, garden, boat or campground, among many other places. The newly-introduced Jig-A-Patch is also making waves in home improvement industry, as the world’s first sprayable spackle in a can.

About Jig-A-Loo and Jig-A-Patch

Jig-A-Loo, a name derived from the inventor’s exclamation “Ti-gi-dou,” the Canadian phrase meaning I’ve got it!” when he found the winning formula, has been used in industrial and commercial establishments since 1958. The product was launched in 1998 in the Canadian mass retail market, quickly capturing a substantial portion of the lubricant market with its clean, dry and smooth application winning over do it yourselfers and professionals alike. Jig-A-Loo is ideal for wood, metal, leather and a number of other surfaces. It is an exceptional water-repellent, a rust and freeze inhibitor, and will not drip or stain. Unlike traditional lubricants, Jig-A-Loo contains no oil, grease, wax or detergent.

Jig-A-Patch is the world’s first sprayable spackle in a can. By combining three key elements needed for wall repair and paint preparation, high-quality sprayable spackle, putty knife and a reusable and washable sanding disk, Jig-A-Patch helps streamline the painting process by shortening prep time and reducing mess.
